ELSEVIER

Thin Solid Films 345 (1999) 340–345

thin solid films

# Subject Index of Volume 345

Adhesion
The effect of residual stress on adhesion of silicon-containing diamond-like carbon coatings, 200
Alumina
Reduction and separation of silica-alumina mixture with argon–hydrogen thermal plasmas, 161
Amorphization
Solid state amorphization in the Co–Ti system, 319
Amorphous silicon
Particle formation and a-Si:H film deposition in narrow-gap RF plasma CVD, 80
Annealing
Effect of heat treatment on nickel manganite thin film thermistors deposited by electron beam evaporation, 307
Atmospheric pressure plasma
Surface treatment of steel using non-equilibrium plasma at atmospheric pressure, 119
Atomic image
Scanning tunneling microscopy operating under a plasma environment, 146

Benzene
Role of adsorbed species on the deposit in the diamond deposition with brominated benzenes as carbon source, 50
Bilayer thin film
Deposition and characterization of zinc oxide and tin oxide ultrafine particle bilayer thin films, 212
Boron carbide
Compositional modification of boron carbide induced by induction plasma treatment, 156

Carbohydrates
Plasma-induced free radicals of polycrystalline carbohydrates as spin probe for plasma diagnosis of plasma treatment, 85
Carbon nitride
Structural and bonding properties of carbon nitride films prepared by dc magnetron sputtering, 18
$C_{60}/C_{70}$ mixture
The effects of the vacuum sublimation process on the composition of $C_{60}/C_{70}$ films, 236
Carbon
Role of adsorbed species on the deposit in the diamond deposition with brominated benzenes as carbon source, 50
Carbon-nitride
Raman characteristics of hard carbon-nitride films deposited by reactive ionized cluster beam techniques, 208
Cementite film
Effects of the power of electron shower and substrate bias on the synthesis of cementite films, 23
Ceria
Characterization of ceria/yttria stabilized zirconia grown on silicon substrate, 330
Chemical vapor deposition (CVD)
Deposition process of metal oxide thin films by means of plasma CVD with $\beta$-diketonates as precursors, 29
Diluent gas effect on diamond CVD growth, 55
Pd–Ni thin films grown on porous $Al_2O_3$ substrates by metalorganic chemical vapor deposition for hydrogen sensing, 217
Atmospheric-pressure chemical vapor deposition of fluorine-doped tin oxide thin films, 240
Cluster deposition
Molecular dynamics study of cluster deposition in thermal plasma flash evaporation, 34
Coatings
The effects of the vacuum sublimation process on the composition of $C_{60}/C_{70}$ films, 236
Platinum substitutes and two-phase-glass overlayers as a low cost alternatives to platinum aluminide coatings, 255
Electrochromic coatings–applications and manufacturing issues, 312
Co–Ti
Solid state amorphization in the Co–Ti system, 319
Cobalt tetraphenylporphyrin
Plasma polymerization of cobalt tetraphenylporphyrin and the functionalities of the thin films produced, 99
Corrosion
Platinum substitutes and two-phase-glass overlayers as a low cost alternatives to platinum aluminide coatings, 255
Cubic silicon carbide
Selective growth of high-quality 3C-SiC using a $SiO_2$ sacrificial-layer technique, 197

DC gas discharge
Deposition and characterization of zinc oxide and tin oxide ultrafine particle bilayer thin films, 212
DC magnetron sputtering
SiC film deposition by DC magnetron sputtering, 42
DC self-bias
Structural and bonding properties of carbon nitride films prepared by dc magnetron sputtering, 18
Deposition process
YBCO films on nickel substrates prepared by spraying a suspension, 284
Electrochromic coatings–applications and manufacturing issues, 312
Diacetylene lipids
Monolayer and epi-fluorescence microscopy studies of amino acid derivatized diacetylene lipids, 292

0040-6090/99/$ - see front matter © 1999 Elsevier Science S.A. All rights reserved.
PII: S0040-6090(99)000281-3

Diamond
Structural characterization of diamond thin films by plasma jet, 60
Diamond deposition
Role of adsorbed species on the deposit in the diamond deposition with brominated benzenes as carbon source, 50
Diamond films
Diluent gas effect on diamond CVD growth, 55
Diamond growth
Diluent gas effect on diamond CVD growth, 55
Diamond-like carbon
Preparation of DLC gradient biomaterials by means of plasma source ion implant-ion beam enhanced deposition, 67
Dielectrics
Spin-on-glass thin films prepared from a novel polysilsesquioxane by thermal and ultraviolet-irradiation methods, 244
Diffractive elements
Negative tone hybrid sol-gel material for electron-beam lithography, 185
Diffusion
Deposition and characterization of zinc oxide and tin oxide ultrafine particle bilayer thin films, 212
$\beta$-Diketonates
Deposition process of metal oxide thin films by means of plasma CVD with $\beta$-diketonates as precursors, 29
Double layers
Characterization of ceria/yttria stabilized zirconia grown on silicon substrate, 330
Drag force
Heat and momentum transfer between a thermal plasma and suspended particles for different knudsen numbers, 140
Dry etching
Characteristics of self bias voltage and poly-Si etching in pulsed helicon wave plasma, 124

Electrical properties and measurements
YBCO films on nickel substrates prepared by spraying a suspension, 284
Characterization of ceria/yttria stabilized zirconia grown on silicon substrate, 330
Electro-motive-force
Photoinduced electro-motive-force of sulfur doped plasma CVD methane film, 71
Electron cyclotron resonance plasma
Parameters measurement of ECR $C_4F_8$/Ar plasma, 130
Electron density
Diagnoses of inductively coupled $SF_6$ and $N_2$ plasmas at atmospheric pressure, 134
Electron shower
Effects of the power of electron shower and substrate bias on the synthesis of cementite films, 23
Electron spin resonance
Plasma-induced free radicals of polycrystalline carbohydrates as spin probe for plasma diagnosis of plasma treatment, 85
Electron trap centers
Electronic properties of MOS capacitor exposed to inductively coupled hydrogen plasma, 172
Electron-beam writing
Negative tone hybrid sol-gel material for electron-beam lithography, 185
Epi-fluorescence microscopy
Monolayer and epi-fluorescence microscopy studies of amino acid derivatized diacetylene lipids, 292

Failure mode
The effect of residual stress on adhesion of silicon-containing diamond-like carbon coatings, 200
Filtering duct
Transport of vacuum arc plasma through an off-plane double bend filtering duct, 1
Fluorine
Atmospheric-pressure chemical vapor deposition of fluorine-doped tin oxide thin films, 240
Fluorocarbon plasma
Parameters measurement of ECR $C_4F_8$/Ar plasma, 130
Fourier transform infrared spectroscopy
Structural and bonding properties of carbon nitride films prepared by dc magnetron sputtering, 18
The effects of the vacuum sublimation process on the composition of $C_{60}/C_{70}$ films, 236
Fuse arc plasma
Time resolved spectrum of the fuse arc plasma, 151

Gallium arsenide
A new InGaP/GaAs double delta-doped heterojunction bipolar transistor ($D^3$HBT), 270
Gas sensor
Application of ITO films to photocatalysis, 38
Glow discharges
An analytic model for energy distributions of neutrals striking a planar cathode at low pressure glow discharges, 182
Glow plasma environment
Scanning tunneling microscopy operating under a plasma environment, 146
Gradient material
Preparation of DLC gradient biomaterials by means of plasma source ion implant-ion beam enhanced deposition, 67
Grain orientation
Dependence of the sheet resistance of indium-tin-oxide thin films on grain size and grain orientation determined from X-ray diffraction techniques, 273
Grain size
Dependence of the sheet resistance of indium-tin-oxide thin films on grain size and grain orientation determined from X-ray diffraction techniques, 273

Heat transfer
Heat and momentum transfer between a thermal plasma and suspended particles for different knudsen numbers, 140
Heated Langmuir probe
Parameters measurement of ECR $C_4F_8$/Ar plasma, 130
Helicon plasma
Characteristics of self bias voltage and poly-Si etching in pulsed helicon wave plasma, 124
Helicon plasma source
Formation and Characterization of the Fluorocarbonated-$SiO_2$ films by $O_2$/FTES-helicon plasma chemical vapor deposition, 45
Heterojunction bipolar transistors

A new InGaP/GaAs double delta-doped heterojunction bipolar transistor ($D^3$HBT), 270
High rate deposition
The high-density microwave plasma for high rate deposition of microcrystalline silicon, 7
High-density plasma
The high-density microwave plasma for high rate deposition of microcrystalline silicon, 7
Higher-silane
Gas-phase diagnosis and high-rate growth of stable a-Si:H, 75
Hybrid sol-gel
Negative tone hybrid sol-gel material for electron-beam lithography, 185
Hydrogen plasma cleaning
Electronic properties of MOS capacitor exposed to inductively coupled hydrogen plasma, 172

Indium tin oxide
Application of ITO films to photocatalysis, 38
Two-dimensional spatial distributions of sputtered particles produced in a planar magnetron discharge of indium-tin-oxide target, 167
Dependence of the sheet resistance of indium-tin-oxide thin films on grain size and grain orientation determined from X-ray diffraction techniques, 273
Induction plasma treatment
Compositional modification of boron carbide induced by induction plasma treatment, 156
Inductively coupled plasma
Electronic properties of MOS capacitor exposed to inductively coupled hydrogen plasma, 172
Infrared spectroscopy
In situ observation of behavior of organosilicon molecules in low-temperature plasma enhanced CVD, 90
Interfaces
Deposition and characterization of zinc oxide and tin oxide ultrafine particle bilayer thin films, 212
Characterization of ceria/yttria stabilized zirconia grown on silicon substrate, 330
Ionized cluster beam
Raman characteristics of hard carbon-nitride films deposited by reactive ionized cluster beam techniques, 208

Langmuir–Blodgett film
$\alpha$-SiC layers grown on silicon via nano-sized silicon nitride precursor route, 188
Large-scaled plasma
The high-density microwave plasma for high rate deposition of microcrystalline silicon, 7
Laser induced fluorescence spectroscopy
Two-dimensional spatial distributions of sputtered particles produced in a planar magnetron discharge of indium-tin-oxide target, 167
Low electron temperature
The high-density microwave plasma for high rate deposition of microcrystalline silicon, 7
Low pressure chemical vapor deposition process
Selective growth of high-quality 3C-SiC using a $SiO_2$ sacrificial-layer technique, 197

Magnetic filters
Transport of vacuum arc plasma through an off-plane double bend filtering duct, 1
Magnetron sputtering
Structural and bonding properties of carbon nitride films prepared by dc magnetron sputtering, 18
Mass spectrometry
Gas-phase diagnosis and high-rate growth of stable a-Si:H, 75
In situ observation of behavior of organosilicon molecules in low-temperature plasma enhanced CVD, 90
Methane
Photoinduced electro-motive-force of sulfur doped plasma CVD methane film, 71
Microprinting
Thin microstructured polymer films by surface-directed film formation, 222
Microstructured polystyrene films
Thin microstructured polymer films by surface-directed film formation, 222
Microwave plasma
The high-density microwave plasma for high rate deposition of microcrystalline silicon, 7
Mixed-gas plasma
Diagnoses of inductively coupled $SF_6$ and $N_2$ plasmas at atmospheric pressure, 134
Molecular dynamics simulation
Molecular dynamics study of cluster deposition in thermal plasma flash evaporation, 34
Monolayers
Monolayer and epi-fluorescence microscopy studies of amino acid derivatized diacetylene lipids, 292
Monte Carlo simulation
An analytic model for energy distributions of neutrals striking a planar cathode at low pressure glow discharges, 182
Morphology
Structural characterization of diamond thin films by plasma jet, 60
Multi-cathode electron beam plasma source
Recent results of multi-cathode electron beam plasma source, 178

Nano-materials
$\alpha$-SiC layers grown on silicon via nano-sized silicon nitride precursor route, 188
Nanoscale hot cluster
Molecular dynamics study of cluster deposition in thermal plasma flash evaporation, 34
Negative ion
Parameters measurement of ECR $C_4F_8$/Ar plasma, 130
Nickel manganite
Effect of heat treatment on nickel manganite thin film thermistors deposited by electron beam evaporation, 307
Nickel oxide
Electrochromic coatings–applications and manufacturing issues, 312
Nitrides coatings
(Ti,Cr)N and Ti/TiN PVD coatings on 304 stainless steel substrates: Texture and residual stress, 263
Nitriding

Low pressure r.f. nitriding of austenitic stainless steel in an industrial-style heat-treatment furnace, 113
Nitrogen dioxide
Application of ITO films to photocatalysis, 38

Optical coatings
W- and F-doped $VO_2$ films studied by photoelectron spectrometry, 229
Optical emission spectroscopy
Surface treatment of steel using non-equilibrium plasma at atmospheric pressure, 119
Optical properties
Electrochromic coatings–applications and manufacturing issues, 312
Organic compounds
Structural characterization of diamond thin films by plasma jet, 60
Organosilicon compound
In situ observation of behavior of organosilicon molecules in low-temperature plasma enhanced CVD, 90
Oxidation
Platinum substitutes and two-phase-glass overlayers as a low cost alternatives to platinum aluminide coatings, 255
Oxygen plasma
Low temperature epitaxial growth of ZnO layer by plasma-assisted epitaxy, 12

Palladium
Pd–Ni thin films grown on porous $Al_2O_3$ substrates by metalorganic chemical vapor deposition for hydrogen sensing, 217
Photocatalysis
Application of ITO films to photocatalysis, 38
Photoelectron spectrometry
W- and F-doped $VO_2$ films studied by photoelectron spectrometry, 229
Physical vapour deposition
Effects of the power of electron shower and substrate bias on the synthesis of cementite films, 23
(Ti,Cr)N and Ti/TiN PVD coatings on 304 stainless steel substrates: Texture and residual stress, 263
Planar cathodes
An analytic model for energy distributions of neutrals striking a planar cathode at low pressure glow discharges, 182
Planar magnetron
Two-dimensional spatial distributions of sputtered particles produced in a planar magnetron discharge of indium-tin-oxide target, 167
Planarization
Effects of carrier film physical properties on W CMP, 278
Plasma chemical vapor deposition
Formation and Characterization of the Fluorocarbonated-$SiO_2$ films by $O_2$/FTES-helicon plasma chemical vapor deposition, 45
Photoinduced electro-motive-force of sulfur doped plasma CVD methane film, 71
Plasma diagnosis
Plasma-induced free radicals of polycrystalline carbohydrates as spin probe for plasma diagnosis of plasma treatment, 85
Plasma enhanced chemical vapor deposition
Particle formation and a-Si:H film deposition in narrow-gap RF plasma CVD, 80
In situ observation of behavior of organosilicon molecules in low-temperature plasma enhanced CVD, 90
Temperature measurement of polymer substrates during plasma irradiation, 94
Plasma irradiation
Temperature measurement of polymer substrates during plasma irradiation, 94
Plasma jet
Structural characterization of diamond thin films by plasma jet, 60
Reduction and separation of silica-alumina mixture with argon–hydrogen thermal plasmas, 161
Plasma polymerization
Plasma polymerization of cobalt tetraphenylporphyrin and the functionalities of the thin films produced, 99
Plasma processing
Computer controlled plasma source ion nitriding, 104
Compositional modification of boron carbide induced by induction plasma treatment, 156
Plasma source ion implant-ion beam enhanced deposition
Preparation of DLC gradient biomaterials by means of plasma source ion implant-ion beam enhanced deposition, 67
Plasma source ion nitriding (PSIN)
Computer controlled plasma source ion nitriding, 104
Plasma treatment
Plasma-induced free radicals of polycrystalline carbohydrates as spin probe for plasma diagnosis of plasma treatment, 85
Plasma-assisted epitaxy
Low temperature epitaxial growth of ZnO layer by plasma-assisted epitaxy, 12
Plasma-assisted evaporation
Temperature measurement of polymer substrates during plasma irradiation, 94
Plasma-induced free radicals
Plasma-induced free radicals of polycrystalline carbohydrates as spin probe for plasma diagnosis of plasma treatment, 85
Plasma-particle interactions
Heat and momentum transfer between a thermal plasma and suspended particles for different knudsen numbers, 140
Plasma-surface interface
Scanning tunneling microscopy operating under a plasma environment, 146
Polymers
Spin-on-glass thin films prepared from a novel polysilsesquioxane by thermal and ultraviolet-irradiation methods, 244
Polymer substrates
Temperature measurement of polymer substrates during plasma irradiation, 94
Porous substrates
Pd–Ni thin films grown on porous $Al_2O_3$ substrates by metal-organic chemical vapor deposition for hydrogen sensing, 217
Process automation
Computer controlled plasma source ion nitriding, 104
Pulse plasma
Characteristics of self bias voltage and poly-Si etching in pulsed helicon wave plasma, 124
Pyrolysis

Morphological differences in ZnO films deposited by the pyrosol technique: effect of HCl, 192
Pyrosol
Morphological differences in ZnO films deposited by the pyrosol technique: effect of HCl, 192
PZT
Growth of (111)-oriented PZT on $RuO_2$(100)/Pt(111) electrodes by in-situ sputtering, 300

r.f. plasma
Low pressure r.f. nitriding of austenitic stainless steel in an industrial-style heat-treatment furnace, 113
Radiation spectrum
Time resolved spectrum of the fuse arc plasma, 151
Radio frequency
Diagnoses of inductively coupled $SF_6$ and $N_2$ plasmas at atmospheric pressure, 134
Raman scattering
Structural and bonding properties of carbon nitride films prepared by dc magnetron sputtering, 18
Raman characteristics of hard carbon-nitride films deposited by reactive ionized cluster beam techniques, 208
Reactive sputtering
Two-dimensional spatial distributions of sputtered particles produced in a planar magnetron discharge of indium-tin-oxide target, 167
Rectification
Plasma polymerization of cobalt tetraphenylporphyrin and the functionalities of the thin films produced, 99
Reduction
Reduction and separation of silica-alumina mixture with argon–hydrogen thermal plasmas, 161
Reduction and separation of silica-alumina mixture with argon–hydrogen thermal plasmas, 161
Residual stress
The effect of residual stress on adhesion of silicon-containing diamond-like carbon coatings, 200
Rutherford backscattering spectroscopy
Spin-on-glass thin films prepared from a novel polysilsesquioxane by thermal and ultraviolet-irradiation methods, 244

Scanning electron microscopy
Plasma-nitrided AISI-316 stainless steel examined by scanning electron microscopy and secondary ion mass spectrometry, 108
Scanning tunneling microscope
Scanning tunneling microscopy operating under a plasma environment, 146
Secondary ion mass spectrometry
Plasma-nitrided AISI-316 stainless steel examined by scanning electron microscopy and secondary ion mass spectrometry, 108
Selective deposition
Selective growth of high-quality 3C-SiC using a $SiO_2$ sacrificial-layer technique, 197
Self bias voltage
Characteristics of self bias voltage and poly-Si etching in pulsed helicon wave plasma, 124
Semiconductors
Plasma polymerization of cobalt tetraphenylporphyrin and the functionalities of the thin films produced, 99
Effects of carrier film physical properties on W CMP, 278
Sensors
Pd–Ni thin films grown on porous $Al_2O_3$ substrates by metalorganic chemical vapor deposition for hydrogen sensing, 217
Separation
Reduction and separation of silica-alumina mixture with argon–hydrogen thermal plasmas, 161
Sheet resistance
Dependence of the sheet resistance of indium-tin-oxide thin films on grain size and grain orientation determined from X-ray diffraction techniques, 273
SiC film
SiC film deposition by DC magnetron sputtering, 42
$SiH_2Cl_2$
The high-density microwave plasma for high rate deposition of microcrystalline silicon, 7
$SiH_4$
The high-density microwave plasma for high rate deposition of microcrystalline silicon, 7
a-Si:H
Gas-phase diagnosis and high-rate growth of stable a-Si:H, 75
μc-Si:H
The high-density microwave plasma for high rate deposition of microcrystalline silicon, 7
Silane
Particle formation and a-Si:H film deposition in narrow-gap RF plasma CVD, 80
Silica
Reduction and separation of silica-alumina mixture with argon–hydrogen thermal plasmas, 161
Silicon
Reduction and separation of silica-alumina mixture with argon–hydrogen thermal plasmas, 161
The effect of residual stress on adhesion of silicon-containing diamond-like carbon coatings, 200
4H-Silicon carbide
α-SiC layers grown on silicon via nano-sized silicon nitride precursor route, 188
Silicon dioxide
Formation and Characterization of the Fluorocarbonated-$SiO_2$ films by $O_2$/FTES-helicon plasma chemical vapor deposition, 45
Characterization of ceria/yttria stabilized zirconia grown on silicon substrate, 330
Silicon nitride
α-SiC layers grown on silicon via nano-sized silicon nitride precursor route, 188
Silicon oxide
Spin-on-glass thin films prepared from a novel polysilsesquioxane by thermal and ultraviolet-irradiation methods, 244
Silicon substrate
Characterization of ceria/yttria stabilized zirconia grown on silicon substrate, 330
Sintered target
SiC film deposition by DC magnetron sputtering, 42
Sol-gel
Platinum substitutes and two-phase-glass overlayers as a low cost alternatives to platinum aluminide coatings, 255
Sol-gel resist
Negative tone hybrid sol-gel material for electron-beam lithography, 185

Sputtering
Growth of (111)-oriented PZT on $RuO_2$(100)/Pt(111) electrodes by in-situ sputtering, 300
Stainless steel
Low pressure r.f. nitriding of austenitic stainless steel in an industrial-style heat-treatment furnace, 113
Steel products
Surface treatment of steel using non-equilibrium plasma at atmospheric pressure, 119
Stress
Effects of carrier film physical properties on W CMP, 278
Structural properties
Characterization of ceria/yttria stabilized zirconia grown on silicon substrate, 330
Structuring
Selective growth of high-quality 3C-SiC using a $SiO_2$ sacrificial-layer technique, 197
Substrate bias
Effects of the power of electron shower and substrate bias on the synthesis of cementite films, 23
Sulfur
Photoinduced electro-motive-force of sulfur doped plasma CVD methane film, 71
Superconductivity
YBCO films on nickel substrates prepared by spraying a suspension, 284
Surface cleaning
Low temperature epitaxial growth of ZnO layer by plasma-assisted epitaxy, 12
Surface condensation
Thin microstructured polymer films by surface-directed film formation, 222
Surface morphology
Morphological differences in ZnO films deposited by the pyrosol technique: effect of HCl, 192
Surface treatment
Surface treatment of steel using non-equilibrium plasma at atmospheric pressure, 119

Texture
(Ti,Cr)N and Ti/TiN PVD coatings on 304 stainless steel substrates: Texture and residual stress, 263
TG analysis
The effects of the vacuum sublimation process on the composition of $C_{60}/C_{70}$ films, 236
Thermal plasma flash evaporation
Molecular dynamics study of cluster deposition in thermal plasma flash evaporation, 34
Thermistors
Effect of heat treatment on nickel manganite thin film thermistors deposited by electron beam evaporation, 307
Thin films
Effect of heat treatment on nickel manganite thin film thermistors deposited by electron beam evaporation, 307
Tin oxide
Atmospheric-pressure chemical vapor deposition of fluorine-doped tin oxide thin films, 240
Transmission electron microscopy
Formation and Characterization of the Fluorocarbonated-$SiO_2$ films by $O_2$/FTES-helicon plasma chemical vapor deposition, 45

Ultrafine particle
Deposition and characterization of zinc oxide and tin oxide ultrafine particle bilayer thin films, 212

Vacuum arc plasma
Transport of vacuum arc plasma through an off-plane double bend filtering duct, 1
Vanadium dioxide
W- and F-doped $VO_2$ films studied by photoelectron spectrometry, 229

X-ray Diffraction
(Ti,Cr)N and Ti/TiN PVD coatings on 304 stainless steel substrates: Texture and residual stress, 263
X-ray photoelectron spectroscopy
Electronic properties of MOS capacitor exposed to inductively coupled hydrogen plasma, 172
X-ray photoelectron spectroscopy spectra
Structural and bonding properties of carbon nitride films prepared by dc magnetron sputtering, 18
X-ray residual stress analysis
(Ti,Cr)N and Ti/TiN PVD coatings on 304 stainless steel substrates: Texture and residual stress, 263

Yttria stabilized zirconia
Characterization of ceria/yttria stabilized zirconia grown on silicon substrate, 330

Zinc oxide
Low temperature epitaxial growth of ZnO layer by plasma-assisted epitaxy, 12
Morphological differences in ZnO films deposited by the pyrosol technique: effect of HCl, 192
